

Steps to Set Up Apple Wallet

1. **Open the Wallet App:** Locate and open the Apple Wallet app on your iPhone.
2. **Add Card:** Tap the + button in the top right corner.
3. **Select Card Type:** Choose **Debit or Credit Card** and tap "Continue".
4. **Enter Card Info:**
 - **Scan:** Position your card in the camera frame to scan it.
 - **Manual:** Select "Enter Card Details Manually" if scanning is not preferred.
5. **Verify:** Follow the prompts from your bank or card issuer to verify the card. You may need to enter a code from a text or email.
6. **Complete:** Once approved, the card is ready for use.

Key Steps to Add Cards to Google Wallet:

- **Open App:** Open the Google Wallet app (or download it from the Google Play Store).
- **Add Card:** Tap "+ Add to Wallet" at the bottom right, then select "Payment card".
- **Enter Details:** Use your camera to scan the card or enter details manually.
- **Verify:** Follow on-screen instructions to verify your card via bank SMS, email, or banking app.
- **Set Screen Lock:** A screen lock (PIN, pattern, or biometric) is required for security.

Steps to Add Payment Cards to Samsung Wallet (get the app from the Galaxy Store)

1. **Open Samsung Wallet:** Locate and open the app on your phone.
2. **Add Card:** Tap the **Menu** (three lines) or **All** tab, then select **Payment cards**.
3. **Choose Method:** Tap **Add** (the plus sign or "Add credit or debit card").
4. **Enter Details:** Use your camera to scan your card or select **Add card manually**.
5. **Verify:** Follow the on-screen prompts from your bank to verify the card (via text, email, or bank app).
6. **Secure:** Confirm a security method, such as a PIN or fingerprint, to finalize.
